Class R EUR-DI of PAM Alpha Fund

Valor: 24476389

ISIN: LI0244763897

Management company: CAIAC Fund Management AG

Objectives and investment policy

The investment objective is to achieve trading profits from the daily trading. The aim of the investment policy is to achieve consistent absolute yields in all conceivable futures market scenarios and to provide a diversification benefit for portfolios with other investment classes.

On the other hand, the Fund can generate revenue from interest income; the latter are achieved by investing the remaining managed assets in largely risk-free interest and money market investments (cash management).

In addition to maintaining the liquidity, the most important objective is to invest the cash holdings as profitably as possible. An optional cash management of the liquid funds of the Fund can reduce risks and increase flexibility.

The accounting currency of the UCITS is EUR, the currency of the share class is EUR.

The investors have the right for daily redemptions. The management company can suspend the redemption of shares if exceptional circumstances make it appear necessary, considering the interests of investors.

Conditions permitted the fund isn't suitable for investors with an investment horizon less than seven years.

Risk and Reward Profile

| Lower risk | | | | Higher risk | | |
|-----------------------------|---|---|---|------------------------------|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| Typically with lower yields | | | | Typically with higher yields | | |

This assessment of the risk-reward profile is based on historic data; a forecast of future movements is therefore not possible. The classification of the Fund may change in the future and does not constitute a guarantee. Even a fund which is allocated to group 1 is not a risk-free investment.

The fund has been classified to category **5** because the price of its shares is normally subject to moderate fluctuations and therefore the risks of losses and opportunities of gains are moderate.

Narrative presentation of risks materially relevant to the fund which are not adequately captured by the indicator:

Credit risk: The fund may (among others) invest in debt securities / obligations. Their emitters may go bankrupt, so that the debt securities / obligations will lose their value fully or mostly.

Market risk: The fund may invest in securities, among others shares. These assets may show larger volatilities in value and higher risk of loss.

Operational risks: The fund may suffer losses by fraud / criminal actions, misunderstandings / errors by employees of the administration company / third party or external influences, such as natural catastrophes.

Counterparty risk: The assets kept with the custodian may be damaged by insolvency, default in care or abusive behavior of the custodian.

Hedging risks: Despite of allowed currency hedging, currency risks may occur since systematic currency hedging can never the less not completely eliminate the currency risks.

Lever effect risk from derivative transactions: The fund may use derivatives. Chances thus increased are accompanied by higher risks of loss or lower chances of profit, in case of hedging transactions.

You will find a detailed presentation of risks and further information on risks in the section entitled "Risks" in the prospectus.
